Art Unit: 1651

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-2, 4, 5 and 14, drawn to a *Klebsiella pneumoniae* composition classified in class 435, subclass 252.1, for example.

II. Claim 13, drawn to a process of identifying *Klebsiella pneumoniae* which enhance growth of a cereal plant, classified in class 435, subclass 39, for example.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the *Klebsiella pneumoniae* product can be obtained by mutation and selection of a known strain or by transformation of a known strain to confer biocontrol properties, such as insecticidal properties, which would naturally enhance growth of the plant. See, e.g., PGPUB No. 2002/0119556.

The requirement of unity of invention is not fulfilled because there is no technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression “special technical features” means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Therefore, a technical relationship is lacking among the claimed inventions involving one or more special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

For these reasons restriction for examination purposes is proper.
